ABOUT US

UAITLAB is a Ukrainian IT laboratory.

We are a team of programmers and designers, QA, DevOps, online strategists, digital masters and marketers.

We are united by a **common goal** - to create conditions for the development of various areas of business in the Internet environment and to build a quality infrastructure for clients of these businesses.

Our **mission** is to help integrate business functions into the Internet to maximize the potential of companies and people.
The company has projects implemented over the past 9 years in Ukraine, France, Great Britain, the USA, Switzerland, and Spain.

We help to speed up where you need to react promptly, save where the budget should be used rationally, optimize and improve processes and products where errors and losses are unacceptable.

EXPERTISE

The type of project we most often develop is a corporate site / portal / landing page + functional internal part (CRM modules, personal offices, except for the standard admin) + integration with external services (ECS, BankID, chatbots, online payments, testing and training systems , video broadcasts, geo-references, directories, external CRM, etc.).

The maximum expertise and what we focus on - we immerse ourselves in business processes, sometimes in the business model, we understand the problems and give solutions, how to automate / scale / solve the client's request with the help of web technologies.

It is important and valuable for us:
- Clear understanding of the task.
- Partner interaction in the project.
- Using technologies to accelerate and scale business.
- Maximum automation.
- Usefulness for business and its customers.

As a technology business partner, we work with a wide range of industries:

- business services, consulting;
- consumer goods and services;
- Internet trade;
- reservation and sale of tickets;
- finances;
- construction;
- arts, entertainment and music;

- production companies;
- telecom operators;
- hotel and restaurant sphere;
- insurance;
- equipment rental;
- automobile sphere;
- teaching.
